MARKET ANALYSIS

We analyze cryptocurrency markets using a combination of price action, volume analysis, market depth, technical indicators and real-time market data. This structured approach helps us understand market trends, identify potential opportunities and make data-driven decisions across different timeframes and trading environments.

01

PRICE ACTION

We study price movement and market structure to identify trends, support and resistance levels, and potential trading opportunities.

02

VOLUME ANALYSIS

Trading volume helps confirm market trends and reveals buying and selling activity.

03

LIQUIDITY ANALYSIS

We assess market liquidity to understand the availability of orders and potential price impact.

04

MARKET DEPTH

Market depth shows real-time buy and sell orders, helping us evaluate market strength and stability.
